

**Note to Readers:** *EHP* strives to ensure that all journal content is accessible to all readers. However, some figures and Supplemental Material published in *EHP* articles may not conform to 508 standards due to the complexity of the information being presented. If you need assistance accessing journal content, please contact [ehp508@niehs.nih.gov](mailto:ehp508@niehs.nih.gov). Our staff will work with you to assess and meet your accessibility needs within 3 working days.

## **Supplemental Material**

### **Organophosphate Insecticide Metabolites in Prenatal and Childhood Urine Samples and Intelligence Scores at 6 Years of Age: Results from the Mother-Child PELAGIE Cohort (France)**

Chloé Cartier, Charline Warembourg, Gaïd Le Maner-Idrissi, Agnès Lacroix, Florence Rouget, Christine Monfort, Gwendolina Limon, Gaël Durand, Dave Saint-Amour, Sylvaine Cordier, and Cécile Chevrier

#### **Table of Contents**

##### **Chemical analyses**

##### ***For the maternal samples (by the LABOCEA Institute, in 2008)***

*Table: Summary of the analytical method characteristics at three levels (for maternal samples).*

##### ***For the children's samples (by the LABOCEA Institute, in 2013)***

*Table: Summary of the analytical method characteristics at three levels (for the children's samples).*

**Table S1.** Descriptive characteristics assessed at inclusion in the cohort of the families participating (n=231) and not participating (n=246) in the 6-year neuropsychological follow-up (PELAGIE cohort, France)

**Table S2.** Univariate analyses for studying the association between WISC scores of 6-year-old children and covariates (n=231; PELAGIE cohort, France)

**Table S3.** Associations between organophosphate urinary metabolites and WISC working memory scores (n=231; PELAGIE cohort, France) with minimal adjustment

**Table S4.** Associations between organophosphate urinary metabolites and WISC verbal comprehension scores (n=231; PELAGIE cohort, France) with minimal adjustment

**Table S5.** Associations between organophosphate urinary metabolites and WISC working memory scores among participants with complete data (n=216; PELAGIE cohort, France)

**Table S6.** Associations between organophosphate urinary metabolites and WISC verbal comprehension scores among participants with complete data (n=216; PELAGIE cohort, France)

**Table S7.** Prenatal urinary organophosphate metabolite concentrations (in nmol/L) across cohorts addressing the potential role of exposure to organophosphate insecticides during pregnancy on neurodevelopment

**Figure S1.** Spline regressions for studying the associations between organophosphate urinary metabolites and WISC working memory scores (n=231; PELAGIE cohort, France)

**Figure S2.** Spline regressions for studying the associations between organophosphate urinary metabolites and WISC verbal comprehension scores (n=231 ; PELAGIE cohort, France)
